PROFESSIONAL EXPERIENCE

IT Manager / Web Developer

Sun Media Corporation (The Sun) | 2024 - Present

IT Manager – IT Infrastructure, Systems & Web Development

- Lead and manage IT operations, infrastructure, systems, and digital platforms to support business objectives.
- Oversee the development, maintenance, and enhancement of corporate websites, microsites, and web applications.
- Manage IT infrastructure, including servers, hardware, software, LAN/WAN networks, Wi-Fi, telecommunications, and endpoint security.
- Lead website development, UI/UX design, responsive interface implementation, and optimization of digital platforms using HTML, CSS, and JavaScript.
- Develop new website features, maintain existing modules, troubleshoot technical issues, and ensure reliable website performance across desktop and mobile devices.
- Design and enhance website layouts, news and content pages, promotional banners, campaign microsites, and classified-related web systems while maintaining brand consistency.
- Manage databases, application connectivity, system backups, data integrity, and recovery procedures.
- Oversee IT asset management, software licensing, IT audits, vendor relationships projects.
- Coordinate with internet service providers and technology vendors to maintain reliable connectivity and resolve infrastructure issues.
- Provide technical support, troubleshoot hardware and software issues, and ensure business continuity across departments and locations.
- Collaborate with editorial, publishing, and business teams to deliver digital solutions aligned with operational requirements.
- Monitor system performance, implement improvements, and ensure the security, stability, usability, and efficiency of IT and web services.

Website Development, Maintenance & UI/UX Design

- Develop, maintain, and enhance The Sun website and related microsites.
- Develop new website features, functionality, and interactive components.
- Maintain existing website modules, templates, pages, and navigation structures.
- Design, redesign, and optimize website interfaces to improve usability, visual hierarchy, and user experience.
- Create modern, responsive layouts for news articles, blog grids, content cards, subscription sections, category blocks, and promotional banners.
- Implement interface designs using HTML, CSS, and JavaScript.
- Ensure cross-device responsiveness performance across desktop, tablet, and mobile platforms.
- Maintain The Sun's branding, typography, spacing, and visual consistency across digital platforms.
- Troubleshoot and resolve website bugs, broken pages, links, images, functionality, and database connectivity issues.
- Optimize website layouts, content presentation, accessibility, and mobile usability.
- Develop and maintain special campaign pages, microsites, and classified-related web systems.
- Coordinate website functionality and content presentation with editorial and publishing requirements.
- Restore website functionality following server migrations or infrastructure issues and verify system stability after major server changes.
- Maintain and improve website components, content structures, and overall digital presentation to ensure reliable performance and a professional user experience.
